ABOUT ME

Innovative UI/UX Expert with 7+ years of experience across multiple industries, 5+ of which at swissQuant Group AG working within the Swiss financial sector.

I make it my goal with any project to deliver the best possible experience to the end user while being considerate to the business needs and development limitations.

A truly great UI/UX experience should strive to be invisible to the end user. We only remember a user experience when it was frustrating and full of roadblocks. My goal is always to ensure this never happens!

WORK EXPERIENCE

UI/UX LEAD | SEP 2022 - PRESENT

SWISSQUANT GROUP AG, ZURICH, SWITZERLAND

- Oversee and actively participate in the creation of user interfaces of financial applications for a wide range of clients such as local/global investment banks, clearing houses and stock exchanges
- As the UI/UX Lead my responsibilities primarily focus on ensuring aesthetic integrity of our products, optimising user flows, refining our component library, developing the company brand, etc.
- Manage, maintain and extend a rich Figma design system that is used for all product wireframes in order to guide code implementation and development discussions
- Generate any branded promotional material related to applications under development, such as isometric architecture maps to illustrate technology stacks

FRONTEND DEVELOPER | FEB 2021 - SEP 2022 (Promoted)

SWISSQUANT GROUP AG, ZURICH, SWITZERLAND

- Worked on all internally developed applications including: ImpaQt Wealth - a production level single page application for financial portfolio management that allows tracking of ESG/SDG impact of individual assets as well as long term predictions of performance and risk exposure
- Goal Based Wealth Management - a prototype single page applications for goal-driven investment portfolio management that allows users to define long-term financial goals, adjust preferences (such as recurring liquidity injections) and adjust investment strategies

WORK EXPERIENCE (Continued)

● **BACKEND SOFTWARE DEVELOPER** | SEP 2019 - JAN 2021

TRANSPORT FOR LONDON, LONDON, UNITED KINGDOM

- Full-time work within the Technology & Development department across multiple teams and projects
- PathFinder - a custom built graph DB solution with an integrated UI and cloud-based API to loosely couple them. This project was a PoC to verify viability of Neo4J's product within the existing TfL infrastructure
- Adiona Integration System - a web-based API, with access to an in-house Oracle database, used to transfer data from a third-party developed data management and analytics system to a series of legacy platforms while maintaining data integrity and loose coupling of all elements

● **FULL STACK SOFTWARE DEVELOPER** | JAN 2018 - JAN 2019

TRANSPORT FOR LONDON, LONDON, UNITED KINGDOM

- Freelance work on multiple webapp projects for TfL's Contact Centre Operations (CCO) department
- Responsibilities focused mainly on frontend UI development using the Vue.js framework and directly injected CSS/SASS styling for components
- Social Media Trends Platform - an internal webapp that pools X posts (formerly Twitter) from multiple accounts, filters for profanity, groups and sorts the remainder and then identifies trends based on customisable filters
- Frequently Asked Questions (FAQ) Platform - an internal tool for customer support agents in the CCO that provides quick answers to FAQs from clients in a refined and accessible UI

HOBBIES

In my free time I can be found absorbed in any good fantasy / sci-fi book, building Lego sets, making origami or cycling across Zurich. I also enjoy group activities with friends such as board games and jigsaw puzzles.
